EDUCATION

Universidad Nacional de Colombia

Bachelor of Science in Systems and Computing Engineering (7th Semester)

Bogotá, Colombia

Expected Graduation: 2027

PROFESSIONAL EXPERIENCE

FrontEnd Developer & Tech Innovator

Bogotá, Colombia

Water & Sanitation Innovation Project (IDB, EAAB, Cewas)

2025 – Present

- Developing an innovative web application to improve access to water and sanitation in vulnerable communities, turning local challenges into scalable tech solutions with real-world impact.
- Designing and implementing a responsive frontend architecture using **JavaScript**, **React**, **Tailwind CSS**, and **HTML/CSS**, translating Figma designs into an intuitive user experience.
- Assisting the backend logic with **Node.js** and managing data manipulation through **SQL databases**.
- Leveraging Artificial Intelligence tools for code generation, continuous testing, and code quality assurance, aligning with modern AI-driven development and productivity standards.

Software Integration & Low-Code Developer

St. Petersburg & Moscow, Russia

1C Enterprise International Championships

2024 – 2025

- Selected through rigorous technical training to represent Colombia in the Professionals Championship (2024) and international automation competitions (2025) focused on business process automation.
- Engineered an **RESTful API** integration between a 1C business solution and a GitLab-managed repository, handling secure token authentication and parsing **JSON payloads** to sync data seamlessly.
- Wrote and optimized **SQL** scripts to extract, manipulate, and visualize database information, ensuring accurate dashboard reporting for IT workflows.

ACADEMIC & INDEPENDENT PROJECTS

PosYa! (JavaLí) — Point of Sale System

Universidad Nacional de Colombia

Full-Stack Software Engineer (Software Engineering I)

2025

- Architected and co-developed a desktop POS system tailored for small businesses in Colombia, managing core modules for inventory control, sales flows, and customer tracking.
- Built a modern, responsive user interface using **React**, **Vite**, and **Tailwind CSS**, packaged into a cross-platform desktop application using **Electron**.
- Implemented a local backend architecture using **Node.js**, **Express**, and **SQLite** for persistent storage, using **Axios** for communication and configuring concurrent runtime scripts.
- Designed system documentation for future scale, factoring in **REST API** communication with the Factus API and compliance with Colombia's national electronic invoicing standards (DIAN).

VendeTon — Wholesale Sales Management App

Universidad Nacional de Colombia

Mobile Application Developer

2025

- Developed a native Android application engineered to optimize wholesale sales management, dynamic inventory tracking, and client portfolios in fast-paced retail environments.
- Built the application using **Java** and the **Android SDK** inside Android Studio, ensuring high performance, responsive UI layouts, and a clean, maintainable project structure.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: React, Node.js, Express, Tailwind CSS, Electron, Android SDK

Tools & Platforms: Git, GitHub, Figma, Gradle, SQLite, Android Studio, 1C Enterprise

Concepts & Methodologies: Object-Oriented Programming (OOP), RESTful APIs, Agile methodologies, Software Architecture

LANGUAGES

Spanish: Native | **English:** Professional Working Proficiency (B2) | **French:** Professional Working Proficiency (B2) | **Italian:** Elementary (A2)
